Mr. Harry Atkinson
Office of Land Quality/Remediation Services Branch
Indiana Department of Environmental Management
100 North Senate Avenue
Room IGCN 1101
Indianapolis, IN 46204

Dear Mr. Atkinson:

The United States Environmental Protection Agency (U.S. EPA) appreciates the Indiana Department of Environmental Management's (IDEM) strong support for the implementation of emergency response actions at the West Vermont Drinking Water Contamination Site (Site) in Speedway, Marion County, Indiana.

This letter requests that IDEM identify all Applicable, Relevant, and Appropriate Requirements (ARARs) for the actions conducted during the removal action that took place at the Site. Any State ARARs identified in a timely manner for this removal action will be complied with to the extent practicable.

The U.S. EPA conducted the following removal actions for the site which includes obtaining access to all properties, providing of drinking water prior to construction completion, and construction of a drinking water treatment system to mitigate potential threat of exposure to vinyl chloride contamination that was identified in private drinking water wells.

Federal ARARs for this site primarily include the Resource Conservation and Recovery Act. Additionally, waste will be transported to and disposed of at an acceptable treatment, storage, and disposal facility pursuant to the U.S. EPA Off-Site Rule 40 CFR 300.440.

If you have any questions regarding this request, or require more detailed information concerning the Site please contact me at (312) 886-0130.

Sincerely,

Brian G Schlieger
U.S. EPA, On-Scene Coordinator
